# Mines and Prospects--Furnaces and Mills

# To Tap Wealth of the All's Well

Long Drive to Its Rich Ores to Be Inaugurated at Once by the Utah Copper Company.

To connect with the much-coveted All's Well ledge which cuts, obliquely, across its domains at Bingham and to draw upon the wealth which awaits it there, the management of the Utah Copper com-pany will begin sinking and driving at This was decided on by the officials of the company yesterday at which time the recommendation made them by Manager D. C. Jackling, after exhaustive inquiry fato the ground, was unanimous-ly concurred in. Meanwhile his colleagues had made personal examination and that connection with the ledge in question shall be made to add almost question shall be made to add aimost immeasureably to the company's resources there is no shadow of doubt. This, indeed, has been conclusively demonstrated through the workings of the Ohio Copper company, by which the All's Well ledge has been followed, practically, up to the Utah Copper company's end-line and to tap a source of tremendous revenue it is but necessary to drive to it. On the 300-foot level in the Ohio the ledge has expanded to a width of twenty-five feet with a streak on the foot wall that affords as much as 50 per cent copper, while the six feet overlying it yields as much as 17 per cent, the next six feet 10 per cent and so on down to 2 per cent. The shaft, which will be sunk that a second heading from which to drift may be established, will be put down on the cast side of the canyon. To connect with the ledge from this it will be necessary, said Manager Jackling, to drive 750 feet, the ore body to be tapped at a depth of 560 feet. Meanwhile a drift will be extended to or connection with the ledge from this it will be necessary, said Manager Jackling, to drive 750 feet, the ore body to be tapped at a depth of 560 feet. Meanwhile a drift will be extended to or connection with the ledge from this it will be made to serve for air.

President MacNeill and Treasurer Penrose left for Colorado Springs yesterday much pleased with the result of their observations and convinced of the merits of their stupendous undertaking at Bingham. The mill is now reducing 600 tons of copper, gold and silver-bearing ore daily and may run the total to 20,000 tons the present month.

ONTARIO'S NEW TABLES.

#### ONTARIO'S NEW TABLES.

#### Seven More Machines Being Added to the Company's Mill.

best evidence of the integrity with which the new mill on the properties of the Ontario company at Park City is doing its work is revealed, perhaps, in an order which has just been placed with Warren C. Bogue, resident manager of the Mines and Smelter Supply company, for additional equipment, this consisting of seven Wilfley tables and silmers. With these the first unit in the new plant will have been completed and that with it the old bonanza will have acquired some resemblance of its former self. In addition to the earnings from this source no one, conversant with its possibilities, believes other than that first-class ore will be added and is not unreasonable to look to the future for a piece of bread money.

With which to increase the battery of slimers that is being exploited with which profitable results at the Daly West there is being added, on an order with the same house, seven more machines of the type originally installed and with these reinforcements, the management will experience no difficulty in squeezing all it is possible to get out of its resources. with Warren C. Bogue, resident manager

#### COLUMBUS CONCENTRATES.

#### First Lot to Be Marketed Before the Close of the Week.

The management of the Columbus Con. of Alta has just recorded another strike in that property, the new ore body having been encountered in a raise from the 1300-foot station in the main tunnel, the 1300-foot station in the main tunnel, and consisting of four feet of nice, if not high grade, material, said Manager Tony Jacobson, during the day. Meanwhile the new mill continues to respond to the needs of the company with the first lot of 100 tons of concentrates to be marketed the present week, while in the bins at the plant is at least 150 tons at this time, with the output to reach thirty tons daily before the expiration of December. With conditions up there Manager Jacobson has the assurance that every interest is much pleased

#### Sale of the Thunderbolt.

Sale of the Thunderbolt.

G. M. Snow, manager of Trappers' Flat Mining company, made public the fact vesterday that his company had taken up the bond on the Thunderbolt mountain claims, which they have been working in advance, the development work having fully justified such a step. The final payment was not due for some time yet, but the company is so well satisfied with the property that they preferred to buy the claims outright, says a Boist, Ida, dispatch.

Ever since this company began its operations about two years ago, great things have been prophesied for this camp. Mining men who have explored Thunderbolt mountain have not been at all backward in expressing the belief that it would come to be one of Idaho's greatest mining camps. The claims which furnish the keynote to the mountain were secured by Mr. Snow and his company, and they have been developing the claims in such a manner as to open up one of the largest and richest ore bodies in the West.

#### Ores and Bullion.

In the ore and buillion market the day settlements amounted to \$155,990. McCor nick & Co. reporting them as they follow American buillion, \$55,400; gold buillion, \$50,000; gold, silver, lead and copper ores \$51,500.

In the metal market silver was station ary at 59 cents an ounce, lead at \$3.569 4.20 per hundred pounds, and easting cop per at 13% cents a pound.

#### THE STOLEN HORSE.

#### An Old Proverb With a New Appli-

The woods are full of "so-called" remedies for Baldness.
You may call anything in creation a remedy, but to use them is like locking the stable after the horse is stolen.
Badness and Dandruff are caused by a serm—if you don't kill the germ the germ will kill the har.
Scientists have labored with the problem of a preventive for Baldness for many years.

#### THE DAY ON 'CHANGE.

No Sprinting, but Steady Demand for More Active Traders.

The day on the mining exchange closed on the sale of 26,4% shares of stock, for which \$12,761.12 was paid, and with the market painfully sluggish. Daly, that had recorded pronounced gains the previous day, was overcome by a "dearth of information," and, from an opening at \$2.60, was permitted to recede to \$2.45, while the Judge was stationary at \$4.50, although the quiet search for it at those figures was decidedly significant, with Daly West hovering around \$13, with a future bringing a few cents better. Mammoth wrapped up a bunch to a bid of \$1.60, with Grand Central an offering at \$1.50 and Ontario at \$4.25, while Yankee Concontinued to hang around 3s cents, with May Day firm and eagerly sought at 33. Silver Shield was quite freely dealt in up to 145, while New York closed on a transaction at 23, the day closing on the following market. narket painfully sluggish. Daly, that had

## Cheerful Condition at Comstock Mine

Eleven Feet of Ore Uncovered by the Management of the Park City Proposition.

Over recent developments in the property of the Comstock Mining company at Park City, George W. Keel, the expert mining man and engineer, has returned from camp not a little enthusiastic, and that the management will have, in a short time, achieved results for which it has been persevering, he expresses no doubt. On the 250-foot level connection has been made with the wealth that overlies the footwall and in the bedding plane along which the hoge for bodies of the camp occur, and at that point the management has no lens than eleven feet of ore, said Mr. Keel, exposed. While a good milling ore preponderates, said he there is in it not a little first-class, and with the new mill in operation the whole will be made a source of considerable profit. Before this is appealed to, however, the management will tap the ledge or the 450-foot level, this to be accomplished, says Mr. Keel, within the next thirty days or thereabouts. It is believed that the percentage of first-class ore, he added will have increased on the lower level, and that less zinc will be in evidence. The management has done a great deal of work at the property and over the present conditions many interests may give thanks today.

Jehn A. Kirby of the Daiy West, who visited the Comstock on Tuesday, and who was in the city yesterday, concurs in all that was said by Mr. Keel and with the ores now in the bedding plane, he has no doubt of important results at an early day.

#### FROM THE SOUTH.

Progress of Work at Newhouse and on the Maje tic.

C. Thomas, under whose general supervision the million-dellar improvements and equipments at Newhouse are being hurrled to completion, came in from camp agein yeaterday morning to share the dinner of all days with his family. Reports from the Majestle company's interests in that region, said he, all indicate many most important changes under the management of Ed F. Freudenthal, and by the miners employed there he is assured that at no time have conditions underground been as faverable to results that have been sought for so long. Mr. Thomas was most agreeably surprised on his arrival from the south to meet his daughter, Mrs. G. B. McMullen of Butte, who had just arrived to participate in Thanksgiving at the parental board. He will leave for camp again Saturday. ments and equipments at Newhouse are

#### MILL FOR THE PFAU.

#### Orders for Machinery Are Placed An Eastern Prediction on the Future With Local House.

For the equipment of the properties of the Pfau company's gold-bearing mines at Chery, Ariz, with a cyanide plant of 200 tons daily capacity, the management has contracted with the local branch of the Mines and Smelter Supply company the forwarding of machinery to begin at the earliest moment possible. In addition to the devices in general use the management has decided, after experiment, to employ the method improvised and tried out in several localities with most satisfactory results, by Ernest Gedbe of this city. The plans for the new plant have been completed, construction to be under the supervision of the company's management. Of the property, it is said that it has a very large volume of milling ore exposed at this time, and that with an efficient mill it will undoubtedly begin the earning of dividends.

J. M. Pine of Denver is in town conferring with L. T. Peer on projected interests in the property of the property in this State. For the equipment of the properties of

# Six Big Channels in Honerine Ground

Extraordinary Developments on the Lower Level in Company's Stockton Territory.

Charles H. Scheu, originator of the un dertaking that has resulted in the recalmation of the Honerine mines at Stockton and organization of the Honorine Mining company fortitude, has found a reward in one of the biggest lead-siler and copper-bearing propositions in the State, came in from camp after taking the measure of the sixth chute of ore on the 900-foot level yesterday. Into this channel the management, said he, had channel the management, said he, had driven for 24 feet when he left, while ore of good quality was yet exposed in the foce of the level. The chapter of disclosures on the 26-foot level has been the most extraordinary in the history of a most remarkable proposition. While but three of these ore-bearing channels were encountered on the level above, the number has been doubted below, while the management has positive knowledge of the kimberly chute ahead, and with a stretch intervening in which still another ought to make. While but little crosscutting has been done to determine the width of this system of channels on the 36-foot level, not one of them but shows the attributes of great strength and a permanency as pronounced as those previously tapped. With conditions throughout the company's vast estate Mr. Scheu, who took hold of it after it had defied the courage of so many, and who ralled one of the most powerful syndicates that ever intered the diggings of Utah, is very much pleased, and that it will begin the reimbursement of its shareholders before the expiration of another season, he has no doubt whatever. The new mill that was rearred upon the ground during the year is doing its work most satisfactorily, and while the ground through which the long drain tunnel is now forging its way is quite satisfactory.

GETTLING TOO MICH driven for 24 feet when he left, while ore

#### GETTING TOO MUCH

#### An Honest Division Not Conducive to a Good Market. "The Daly West Mining company con

oues to pay monthly dividends of 40 ents per share, this amount having been paid to the stockholders on the 15th of this month. It has been predicted by Salt Lake City people that dividends would be discontinued ere this, but we

would be discontinued ere this, but we believe that today more stock is owned in the East, especially in Cinchmat!, New York and Boston than for some time, and that westerners will not be as prominent in the management of the property in the future as in the past," writes Hayden, Stone & Co. of Roston in their weekly market letter.

"The company appears to be earning dividends of 40 cents per share and adding to this surplus, although it is not treating the same percentage of high-grade ore as at this time last year, and, as we have said before, it is becoming more of a concentrating proposition. On the present price 14, the stock nets 34 per cent, and this fact, if nothing else, has kept a great many eastern mining as kept a great many eastern mining tock investors out of the proposition.

Rather a grotesque view to take of the ividend, and yet the condition, nevertheless exists. The lesson is one by which he miner should profit and trim his divi-

Where the Cars

Send today for a book which will inspire any man to be strong and vigorous—a book you will like to read. It tells how o cure weak men, and gives illustrations of the effect of my beit upon weak, nerveess men. I send the book, sealed, free, if ou inclose this ad.

six ounces silver with \$2.50 gold per ton. six ounces silver with \$2.50 gold per ton.
Fred B. Whitmore, superintendent of
the Queen mill at Bingham, came in from
camp last night, accompanied by Frank
B. McNeill, foreman of the company's
mines Mr. Whitmore says a night shift
is to be operated at the mill in future.
Joseph Dederichs, superintendent of
construction at Newhouse, arrived from
that camp of copper yesterday. Five carleads of steele were delivered on Tuesday and the main structure at the new
plant will be, he says, enclosed in three
weeks.

Manager Lawrence of the Scottish Chief of Park City yesterday marketed two lots of ore, one of them on controls showing ninety-five ounces 2° 3 per cent copper 7 per cent lead 1 31.60 gold, the other showing 22 per cent lead, twenty-eight ounces silver, 29 per cent copper and eighty cents gold. A third lot of lead ore is now in transit.

### More Space Wanted.

PORRTLAND, Or., Nov. 22-So great is the demand for space at the Lewis and Clark fair that the present foreign ex-hibits building and the liberal arts build-ing are found to be entirely inadequate, and ways and means will at once be de-vised to provide necessary additional space.

### Trial Trip of Pennsylvania.

BOSTON. Nov. 23—The new cruiser Pennsylvania on her official trial trip today averaged 22.43 knots an hour. Her contract called for 22 knots. This shows the Pennsylvania to be the fastest war-ship of her class in the American navy.

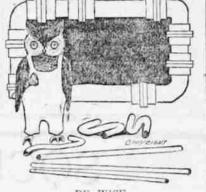

# Great Cut in Turkeys.

We refer to the cut to be made by any of our keen cutting carvers at the Thanksgiving dinner, the merits of which have been attested by many shrewd housewives the past few days. Never have we sold so many carving sets in so short a time.

### Turkey Well Done

Indeed, if it is roasted in one of our popular roasters. They cook thoroughly and evenly, and never burn.

# The **Calt** Lake Hardware Co
